

RAGHAV AWASTHI

+44 7448 420483 | raghavawasthi@me.com | linkedin.com/in/raghavawasthi2005 | github.com/raghav2005

EDUCATION

University College London (UCL) <i>Bachelor of Science in Computer Science, First Class Honours</i>	London, UK Sep 2023 - Jun 2026
Dubai College <i>A*A*A*A*A in A-Levels and 11 grade 9s in GCSEs</i>	Dubai, UAE Aug 2016 - Jun 2023

EXPERIENCE

AI/ML Engineering Intern <i>VotalAI</i>	Jul 2026 - Present
- Implemented three configurable safety-model modes - Votal, NVIDIA Nemotron and dual-model - on a feature branch by extending the vLLM serving layer and synchronous/asynchronous router with concurrent verdict aggregation. - Corrected API-contract mismatches by implementing Nemotron-specific payload construction, safety-category parsing and dual-model OR aggregation; kept 1,066 offline tests green and added two live safety cases.	
Cybersecurity Analyst <i>Barclays</i>	Jun 2025 - Aug 2025 Knutsford, UK
Cut certificate triage time 25% and flagged 30+ high-risk certificates by building production Python services for chain enrichment, root-cause classification, record normalisation and risk scoring.	
Full-Stack Developer <i>Adamas Data</i>	Aug 2024 - Oct 2024 London, UK
Kept median query latency below 3 seconds across 140M+ rows and 150+ filter combinations by indexing PostgreSQL and PostGIS queries behind 30+ versioned FastAPI endpoints.	
AI/ML and Quantum Security Intern <i>Tech Mahindra</i>	Jun 2024 - Aug 2024 Pune, India
- Raised domain F1 15% on a 6k-question benchmark and cut mean GPU inference latency 20% by leading a five-person team to LoRA fine-tune a 7B-parameter model on 120k curated records. - Improved top-1 retrieval MRR 25% and reduced hallucination rate to 7% by adding hybrid BM25 retrieval and a MiniLM re-ranker to Garuda. - Enabled A/B testing of new checkpoints in under five minutes by shipping a Gradio and Flask demo with JWT authentication and Selenium tests.	

PROJECTS

Playo - Audiobook Generator <i>Python, Firebase, OpenAI, ElevenLabs, TypeScript</i>	Jan 2024
Delivered end-to-end personalised audiobook generation by combining user preferences with OpenAI story generation, ElevenLabs speech and a TypeScript/Firebase mobile application.	
Quantum Proximity Gateway (IBM and UCL) <i>Python, Rust, C++, Next.js</i>	Oct 2024 - May 2025
Automated identity recognition at the edge by integrating Raspberry Pi facial recognition with BLE proximity signals and downstream PC authentication.	

TECHNICAL SKILLS

Languages: Python, C/C++, Rust, JavaScript/TypeScript, SQL, Bash
AI/ML: PyTorch, TensorFlow, Hugging Face, LoRA, LLMs, RAG, BM25, MiniLM, model evaluation
Serving/Data: vLLM, FastAPI, Flask, Redis, PostgreSQL, Pandas, NumPy, Gradio
Engineering: Docker, Linux, CI/CD, Git, REST APIs, microservices, Selenium

OPEN SOURCE AND LEADERSHIP

- Delivered merged contributions to Microsoft Terminal, mactop and Docusaurus; served as a UCL programming tutor, cricket vice-captain and technical writer.
